MOSO

## GRAPHIC SOLUTIONS

Curved POP Tower

Base (x1)

Top Bar (x1)

Bolts (x4)

Hex Key (x1)

Rails (x2)

ASSEMBLY

• Insert one end of each of the Rails into the recessed square section of the base, so that the hole in the base aligns with the threaded insert in the Rail.

• Insert a bolt through the Base and into the thread of the Rails, tighten with the Hex Key.

• Align the Top Bar onto the top of the rails, insert bolts, and tighten with the Hex Key.

• Slide one edge of the graphic face into the channel of the Rail, bend it slightly, and insert the other edge into the channel of the opposite rail. Repeat with the graphic for the other side of the tower.
