

## MIRROR CLING INSTALLATION

**STEP 1** Start with a clean mirror surface. The printer recommends that you use a light mist of water (no soap or glass cleaner) on the mirror where the cling will go.

**STEP 2** Place the cling on the misted glass, mist the back of the cling lightly, then use a credit card wrapped in a paper towel to push the air and bubbles out from between the cling and the glass.

**STEP 3** Keep the cling's backing paper/liner rolled up for re-use.
